Why take MaxMedical Shield?

✔ Low premium payment

✔ Increase your savings on healthcare

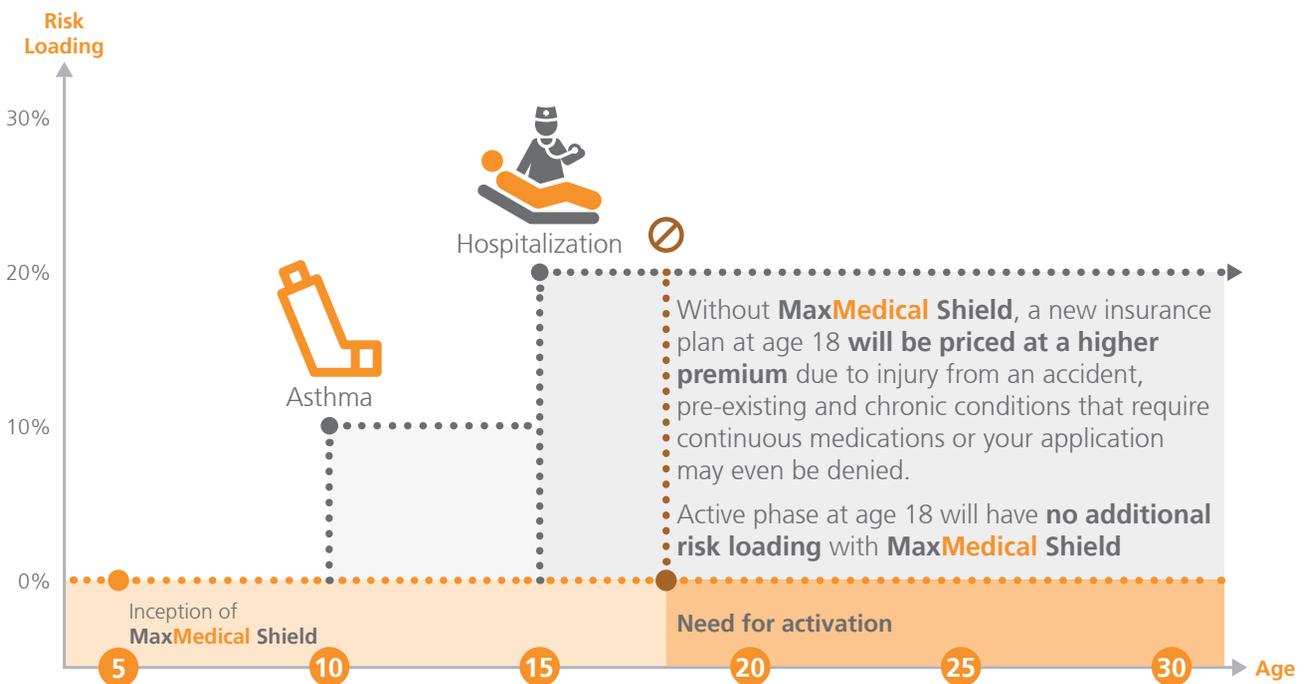

✔ Flexible activation period

Who can apply?

Any legal resident of UAE with current medical health insurance plan

How does it work?

Securing the education and health of your child has the same level of importance. This is why most parents send their children abroad to get the best education. But depending on your country of preference, having a comprehensive medical insurance in place may be an advantage for your child and will save you a lot of money due to the high cost of health care in some countries.

MaxMedical Shield is a dormant plan giving you security that a follow-up cover is guaranteed regardless of the actual medical condition at the time of activation to full cover.

Without **MaxMedical Shield**, a new insurance plan at age 18 **will be priced at a higher premium** due to injury from an accident, pre-existing and chronic conditions that require continuous medications or your application may even be denied.

Active phase at age 18 will have **no additional risk loading** with **MaxMedical Shield**

What is medical underwriting?

It is the evaluation of the health information based on the medical declaration of an applicant to determine the individual risk which will be the basis of the premium for insurance cover.

Your future health is uncertain and its protection is unpredictably risky.

Eliminate this risk with MaxMedical Shield.
